Trusting AI:
What does it mean & should we?

How did I get here?

Definitions

AI

- Artificial intelligence
- Includes things like machine learning and predictive modeling

Generative AI

- LLM
- Generates content whether that is text or image or video

eXplainable AI (XAI)

- Methods that explain how an outcome occurred... not always understandable

Trustworthy AI (TAI)

- At the forefront of the EU AI Act [3]
- 7 principles proposed: human agency and oversight, safety, privacy, transparency, fairness, societal and environmental well-being, and accountability [2]

The State of AI

- Who is regulating AI?
- Who is benefiting from AI?
- Where are we going?

What is your experience with generative AI?

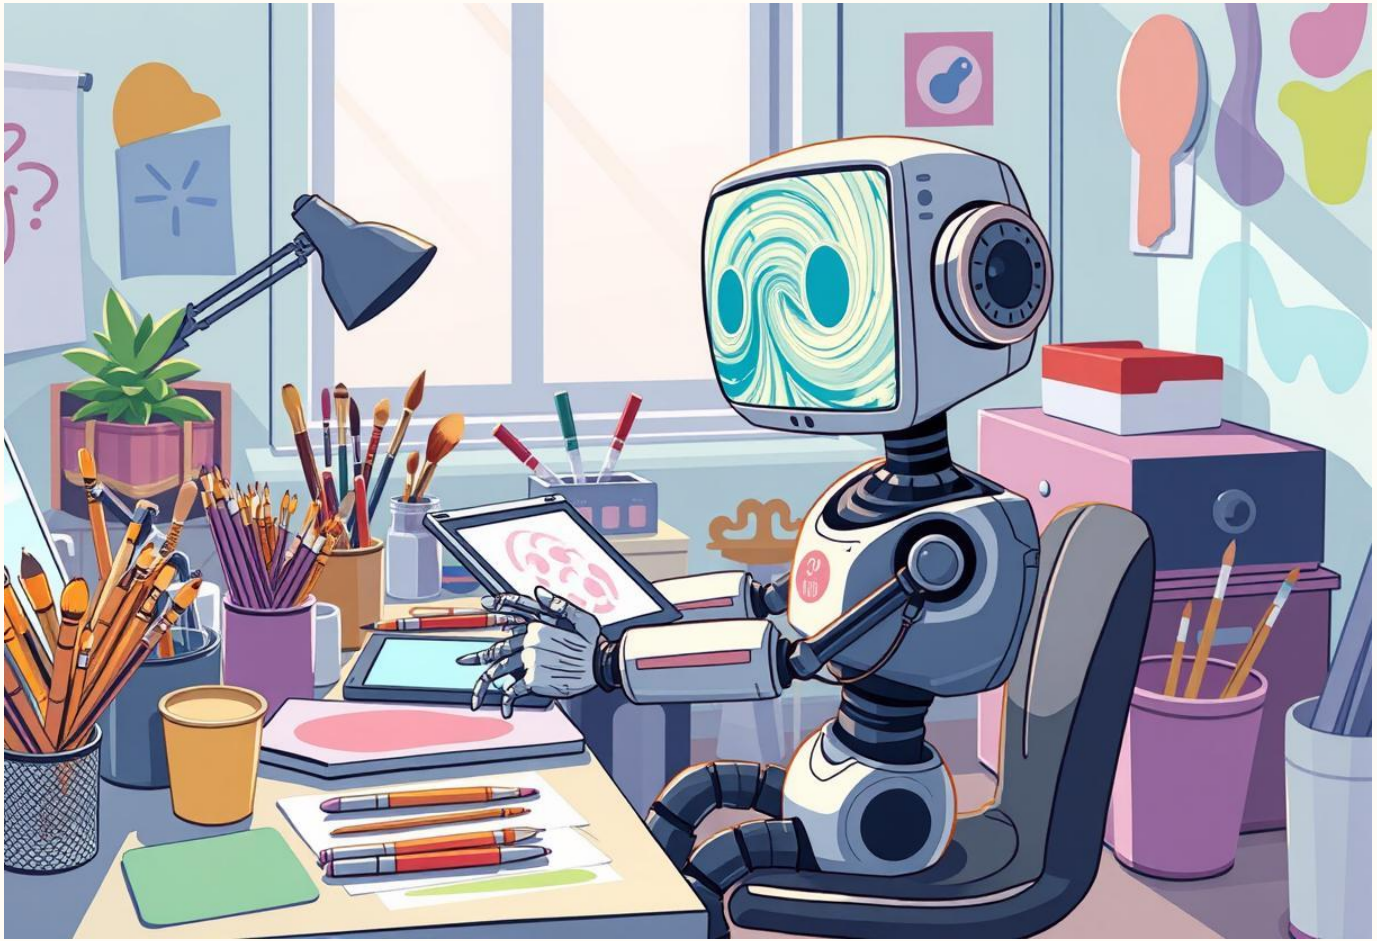

So, what is trust?

Defining Trust

“an attitude that an agent will achieve an individual's goal in a situation characterized by uncertainty and vulnerability” [1:51]

TFI
Stop 7672
PA 44

Context matters.

Generated on Gamma with the prompt “anthropomorphic generative AI” using the Flux Fast model.

Why does trust matter?

Appropriate trust

Workforce and business implications

Governmental and policy implications

What will my contributions be?

Evaluating current trust methods

Developing a protocol to evaluate, measure, and understand trust

Running studies on trust of generative AI tools in the workplace

Explore the role of explanations (XAI) on trust
